Weather Proof Perennials—

often without a protecting snow blanket and hot dry summers.

Temperatures range from 20 degrees below zero F. in winter to 100 degrees in the shade in summer. We have periods of heavy rainfall and periods of drought just the same as you do.

Our soil while very fertile and productive is only good bottom land used for growing corn before we took it over. We do not have deep black celery soil or sandy old lake bottoms to force fast growth on plants that often fail to hold up when moved to your garden soils.

ROCKNOLL'S PLANTS WILL GROW FOR YOU.

WHAT ARE THESE WONDERFUL CUSHION MUMS

Cushion Mums are dwarf, compact, bushy chrysanthemums rarely over 15 inches in height and so covered with flowers that they resemble the dwarf Azaleas. They are very hardy blooming from August till frost the first year and from June till frost the second. There are literally hundreds of flowers on each plant.

ALL OUR LILIES ARE AMERICAN GROWN

Because of the war our supply of Dutch and French
Lilies is cut off so we offer only such varieties as
can be successfully grown on a commercial scale in
this country. These Lilies are all free of disease,
firm plump bulbs with roots intact which helps them
start easier than imported bulbs.
